

app/page.tsx

```
const readinessScore = Math.round(
  (readiness.reduce((total, value) => total + value, 0)
    / readiness.length) * 10,
);
```

The teaching triage keeps the rubric visible and deterministic.

app/page.tsx

```
function updateReadiness(index: number, value: number) {
  setReadiness((current) => current.map((item, itemIndex) =>
    itemIndex === index ? value : item));
}
```

Each criterion is independently adjustable and remains accessible.

app/page.tsx

```
window.location.href =
  "mailto:ashhadulislam@gmail.com,minagayid@gmail.com?...";
```

The contribution flow prepares an email handoff; it does not upload patient data.
